For unemployed, especially under 30 years old, who graduated from the university or who are in their last year at the university.
Contact and/or web page
<a href="http://www.mma.es/educ/ceneam">www.mma.es/educ/ceneam</a> +34 96 268 00 00
Course Programme
Concept of prevention and eco-efficiency; Eco-efficiency in the production processes; Eco-efficiency in the design of products
Teacher staff profile
Experts from the public administration, universities and professionals from public and private institutions
Degree obtained at the end of the course
Diploma for the course
Is it a pioneering experience? In which year did it start?
It was a punctual subject that took place in March-April-May 2003. It took place in Alicante and Valencia. It is only an example, as a set of similar subjects are taught. Most of the subjects change every year and some remain year after year, but all are linked to sustainable development or to environment.
Impact, Evaluation, Results (4 lines)
There are always students who find a job linked with the subject after graduating. Students are usually happy about their teachers. The teachers who receive bad evaluations from their students are dismissed for next year.
Problems (4 lines)
There is no mentoring of the course, so that the impacts of the courses lack precision.
Future, Sustainability (4 lines)
It seems to work well, as a lot of other similar training are scheduled for the months and years to come

**Comments:**

The course is entirely free for the students. Even sandwich for lunch or coach transport from the centre of the town to the place where the course takes place are free. It means that there are a lot more demands of inscription than places available. As the course is aimed to people graduated from the university, the level is high. Dissemination channels are Internet, daily press, leaflets (tripticos) and university newspaper. The contribution of enterprises to the course concerns the material, the advising and the homogenization. Each subject has a theoretic and a practical part, and the teacher staff comes from all Spain.

**RATING:**

0: INADEQUATE

1: NORMAL

2: GOOD

3: EXCELLENT

FORCREST - GOOD PRACTICES DETECTION				
CRITERIA	RATING			
	<i>Mark with X</i>			
	0	1	2	3
Dissemination channels				X
